

Supply chain modernization

Large commercial Japanese automotive company

Region: **Headquartered in Japan**

Industry: **Commercial Vehicles**

Services Provided: **HANA Based SAP**

Implementation

Revenue: **USD 7.6 bn**

Business Needs

- Streamline the dealer retail finance operations.
- The current DMS was not satisfying the logistic processes and also did not have finance and controlling functions.
- Migrate to the new architecture with Siebel DMS and SAP S/4HANA

Value Proposition

- Implemented FI,CO and logistic processes on SAP HEC S/4HANA V15_11
- Real time integration of Siebel DMS and other systems with SAP S4/ HANA
- Review & enhancement of existing processes by utilizing the SAP S4/ HANA advantages (e.g.: New Vehicle Sales, Used Vehicle sales, Insurance processes / Service processes)
- Provide multidimensional reporting – profitability at vehicle level, sales office level and dealer shop levels

Benefits

- Improved transparency of entire supply chain processes across Japan impacting USD 2B business
- Modernization of warehouse using SAP and digital technologies leading to improvement efficiency
- Digitalizing of manufacturing using Factory of Future
- Advanced Analytics – profitability, sales revenue, expense & inventory reporting
- State of the art reports / dashboards on HANA
- Improved user experience
