

Innovate sustainably with digitally orchestrated next-gen PLM solutions and services

Drive PLM excellence with multidisciplinary digital threads, backed by Bosch's 15+ years of expertise and 75+ successful clients

Refine your product lifecycle to drive success

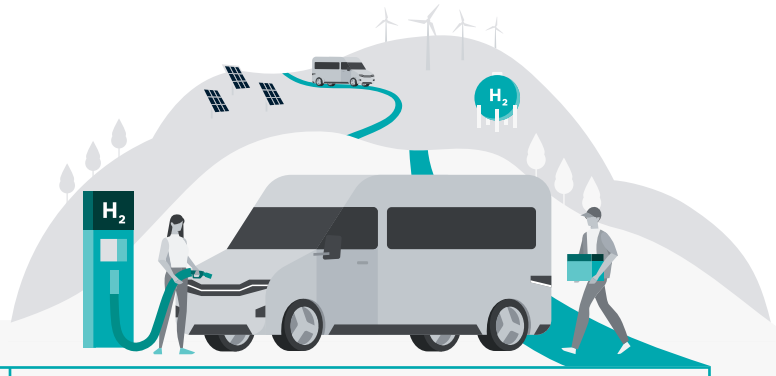

Bosch digitally orchestrates design intent and operational data sustainably – our digital threads enable seamless collaborations and improved CX, along with a continuous IoT-enabled feedback loop for accurate iterations.

Where's the gap?

Where we come in

Ensure the availability of engineering product data throughout the product lifecycle journey for uninterrupted collaboration and productivity with our integrated services.

PLM Advisory and Consulting

Relish the journey toward new-age digital PLM and chart a success roadmap for digital transformation.

R&D Process Consulting

Enhance R&D innovations by designing, implementing, controlling, and optimizing development processes.

End-to-End Implementation & Cloud

Enable seamless cloud migration and support of legacy PLM systems with SaaS and PaaS approach.

Upgrade and Migration

Optimize your PLM systems during and after your M&As and finetune their performance.

Application Support and Training

Get the best out of Bosch's Support and Training model with a top-tier experience.

Digital R&D and IoT

Digitize your products and processes with our model framework of "Sensor-Software-Services".

Digital Thread

Augment the product traceability right from R&D innovations and data-driven architecture.

Digital Engineering Excellence

Leverage Bosch's unique framework and interoperability to enhance digital thread efficiencies.

Data Lake

Enhance productivity for efficient decision-making with a data-driven architecture.

Our partners

SIEMENS

Why Bosch?

One of the early technology adopters globally

Close collaboration with product ISVs

Depth and breadth of domain knowledge
