

Smarter Decisions, Better Results

# Join the 80% of SAP Users Experiencing Enhanced Decision-Making

At a critical juncture in US manufacturing, amidst global shifts and evolving demands, "Smart Manufacturing" emerges as a beacon of hope. Reimagining the sector with smarter, connected solutions, **Bosch SDS**, powered by SAP, stands out and leads the charge to a new era of American manufacturing.

**20%**  
Implementing SAP can significantly boost productivity by 20%.

**80%**  
of SAP users experience better decision-making processes.

**70%**  
of SAP users experience greater customer satisfaction.

## Major Challenges in American Industrial Manufacturing

## Triumphs and Milestones: Our Success Stories

**For a leading engine manufacturer**

- 99% Resolution by 2nd Level Team.
- 4% Consolidated productivity improvement YoY.
- 100% offshore based support.
- Increased Customer satisfaction.

**For one of the world's largest commercial vehicle manufacturers**

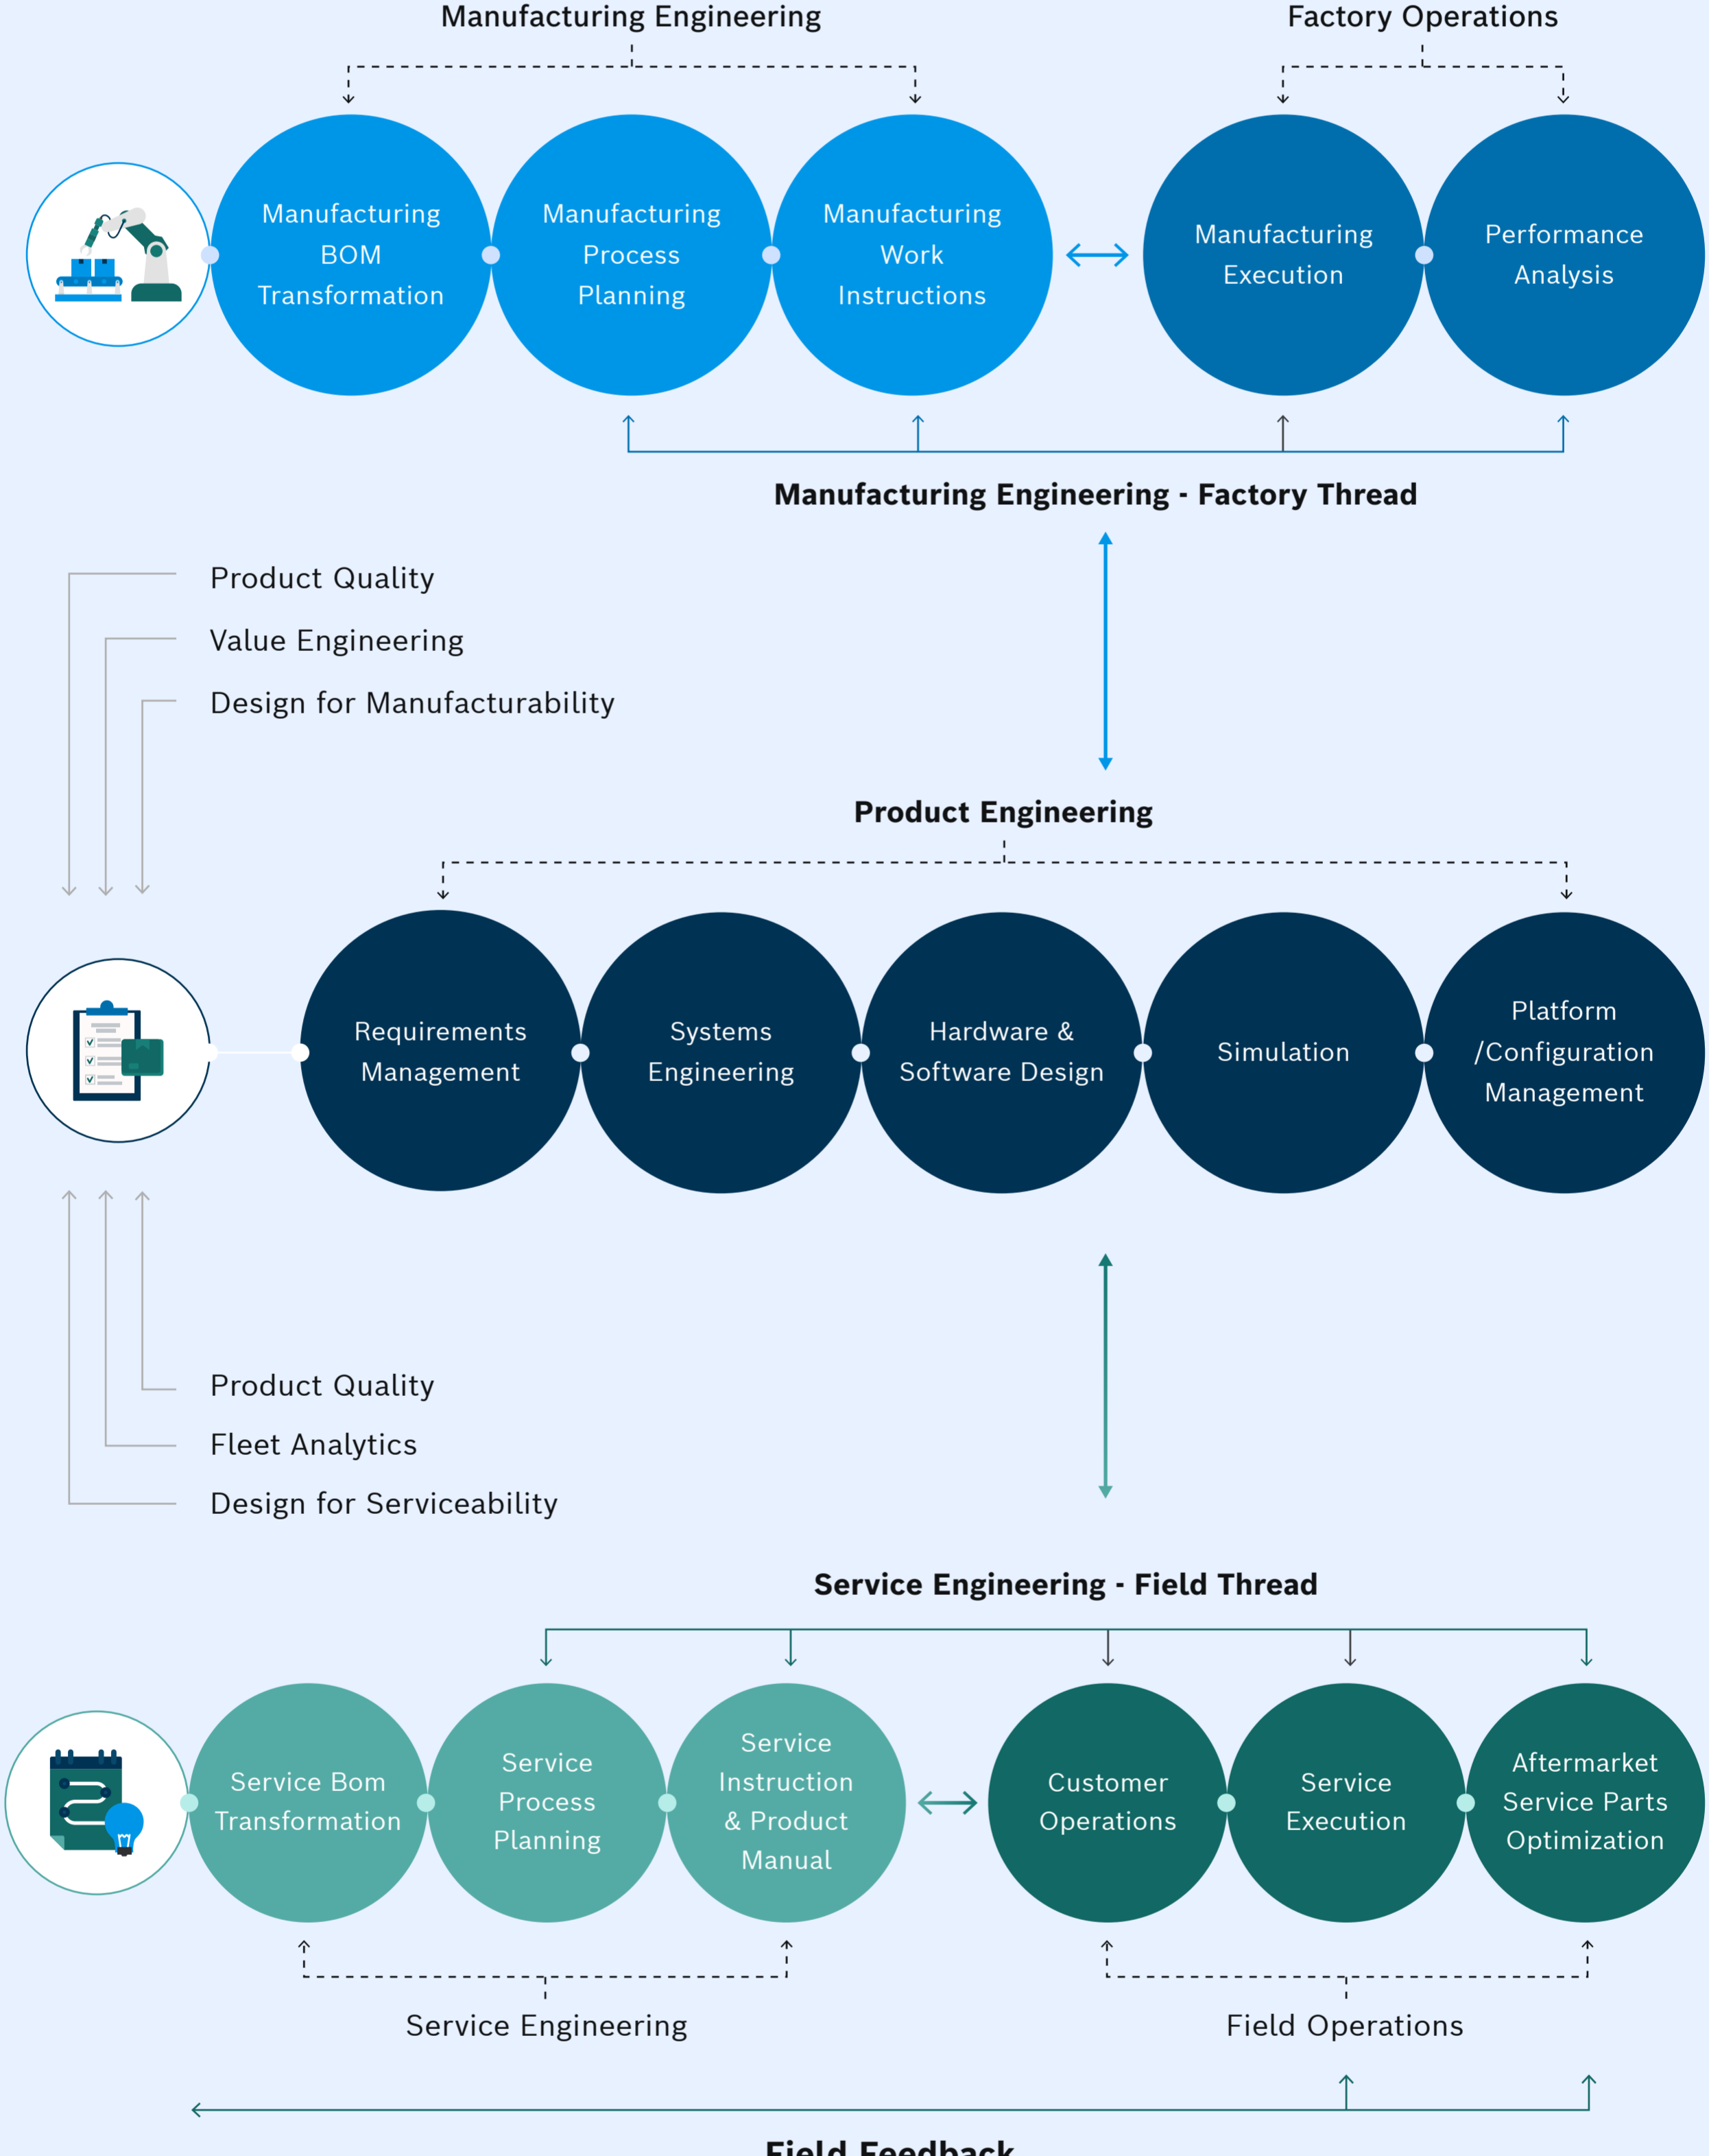

- Single point of contact for all application support.
- Single ODC for 1000+ users worldwide.
- Overall reduction of incidents by 16%.
- Exceeding SLA baseline of 98% since January 2012.

**For a leading German Conglomerate**

- Cost savings of 2 million euros in 2016 with transition to Managed Service model.
- Over 100,000 tickets/year.
- 120+ Productive systems.
- 10% Consolidated productivity improvement over 4 years.

## Digital Threads Across Design, Manufacturing and Aftermarket

Bosch's implementation of digital threads across the entire lifecycle of product development, manufacturing, and aftermarket services offers a transformative solution to the multifaceted challenges encountered by industrial manufacturers.

Our Digital Thread, underpinned by REDLake (Robert Bosch Enterprise Data Lake) and integrated with SAP Product Lifecycle Management, serves as the cornerstone of our product engineering continuum.

After receiving the Manufacturing Bill of Materials (MBOM), the Digital Thread seamlessly disseminates manufacturing work instructions, engendering a symbiotic relationship between product engineering and shop floor operations.

This cyclical feedback loop extends post-market, where insights gleaned from field operations and aftermarket engagements inform New Product Development (NPD) initiatives.

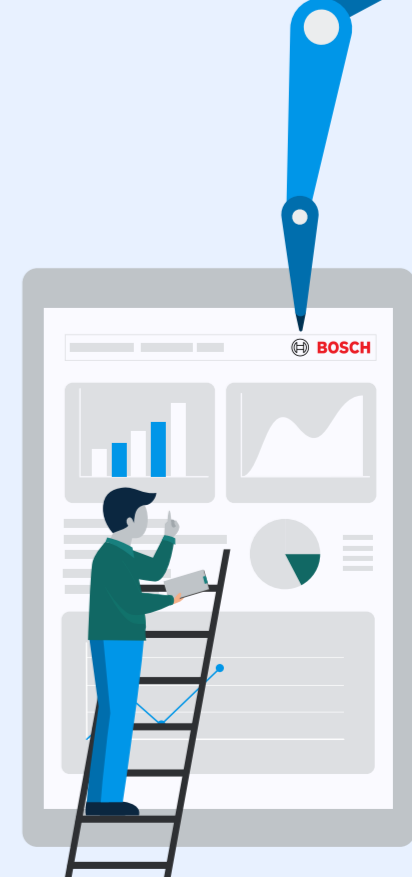

## Unlocking Advantages: Why Should You Choose Us?

With over 20 years of experience in SAP solutions, Bosch stands as an ideal tech partner to help manufacturers modernize their ERP capabilities and RISE to unparalleled heights with a myriad of exceptional benefits:

- Structured methodology with tools, best practices, and services to guide migrations from SAP ERP to SAP S/4HANA Cloud Private Edition.
- Deployment with accelerators to massively reduce time to value.
- ERP Clean Core strategy to evolve rapidly, reduce project risk, and unlock true potential.
- Cloud-driven ERP to scale on demand, increase overall innovation, and meet growing needs.
- SAP Business Technology Platform powered by intelligent applications.

## Our Suite of SAP Offerings

- Bosch Migration Dashboard with Upload Templates.
- BTP-enabled EDI Playbook for 3PL Integration.
- Bosch Automation Testing Tool for Rollouts.
- Requirements Traceability Matrix Templates.
- Inbuilt Industry-Specific KPI Dashboards.
- Integration Dashboard for Error Handling and Monitoring.

Get ready for the future of industrial manufacturing with Bosch SDS.
